Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: Griffin et al (US 6,439,327) reference is considered to represent the most relevant state of the art, which discloses a cutting element comprising a layer of polycrystalline diamond layer 31 bound to a substrate 32 along an interface, the prior art however differs from the claimed invention by having an outer peripheral surface of softer molybdenum layer extending between the working surface and the interface. The prior art also fails to show an annular region adjacent the peripheral surface that extend away from the working surface, and being lean in catalyzing material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
